Ostrow Electric Completes Renovation of MIT Sloan Building (E52), 50 Memorial Drive, Cambridge, MA

Architect: Beyer Blinder Belle Architects and Planners, LLP, New York, NY; Engineer: BR+; Boston, MA; CM: Consigli Construction, Milford, MA

The full renovation project was completed in June 2016 and is part of the retrofits on the historic MIT Sloan Building.

Ostrow Electric is proud to be a member of the project team that not only challenged but also worked to renovate the historic MIT Sloan Building.

The project included:
- The installation of new 240 hanging, 9-foot LED rods designed by artist Leo Villareal. The work features a two-directional amplifiers enable MIT and fire department personnel coverage throughout the building in the event of an emergency. Additionally, the 5th-floor system includes a firewater smoke control panel as well as post-event smoke purge system as well.

In summary, Ostrow Electric was able to work with the architect, owner, and electrical contractors to complete the project while maintaining safety and quality. For a complete directory of NECA Greater Boston Chapter member firms, call 1-877-NECA-IBEW or visit us at www.bostonneca.org.
