A Message from the Executive Manager

NECA’s Ongoing Education & Training Programs – Keys to Success in the Field - Part II

Education and training are critical to success in electrical construction. The result is superior quality workmanship in the field, highly skilled project management, more efficient project delivery, and a higher level of safety precautions in the field. NECA contractors’ knowledge and resulting performance is seen in complex and demanding projects throughout our region, project after project.

The rapidly evolving technologies and platforms on which today’s construction projects are planned and built – BIM, Lean Construction, Prefabrication, EPC projects, and so many others, demand ongoing vibrant educational programs that keep our contractors and our skilled IBEW workforce on top of ongoing advancements in the industry. From Advanced Project Management seminars to Foreman Training programs, NECA contractors access the latest information in all aspects of electrical and tel/data construction.

Nationally, NECA also provides educational resources and webinars covering such topics as “Connecting the Digital Building,” new OSHA regulations, NFPA 70E, Silica, Fall Protection, and Electronic Recordkeeping; NEC Changes; LED Lighting Retrofits and many others. The NECA Safety Meeting App is being widely used and is superior quality workmanship in the field, highly skilled project management, more efficient project delivery, and a higher level of safety precautions in the field. NECA contractors’ knowledge and resulting performance is seen in complex and demanding projects throughout our region, project after project.

The NECA Safety Meeting App is being widely used and is superior quality workmanship in the field, helping manage and document safety meetings, job briefings, and safety checklists.

This issue of Connections touches on just a couple recent industry-leading educational programs presented by NECA Boston and attended by our contractors: BIM Construction Workflow and Productivity & Profitability.

The June Boston Chapter meeting also focused on education and training (see page 8). There, Chris Sherlock, Training Director of JATC Greater Boston, presented an all-encompassing look at our comprehensive electrical and telecom training programs, which is a cornerstone to Boston’s union electrical industry and our unparalleled skilled labor partners at IBEW Local 103.

Looking ahead, on September 11, NECA Boston will hold a first-ever Best Practices for Electrical Contractors workshop as well as a Fundamentals of BIM workshop. For details and to register, call NECA Boston at 617-969-2521, e-mail Assistant Chapter Manager Kristen Gowin kgowin@bostonneca.org, or visit the Calendar on bostonneca.org.

Governor Baker Signs Paid Family Medical Leave

On Tuesday, September 11, NECA Boston will host a Best Practices for Electrical Contractors workshop at the Boston Marriott Quincy. The program is designed to inform electrical contractors about proven business practices in the industry that lead to success. Sessions on Project Management, Specialty Insurances, Surety Bonding, Commercial Lending, and Understanding Contractor Policies and Requirements will be presented by leading industry professionals. The event will be sponsored by NECA Premier Partners – Northeast Electrical Distributors and Milwaukee Tools. For details and to register, call NECA Boston at 617-969-2521, e-mail Assistant Chapter Manager Kristen Gowin kgowin@bostonneca.org, or visit the Calendar on bostonneca.org.

IBEW Local 103 / NECA Boston Named Proud Partners of the Boston Red Sox

IBEW Local 103 and NECA Boston Chapter have forged a broader partnership with the Boston Red Sox that will help power a number of key charitable initiatives. The agreement makes Local 103 and NECA proud partners of the Boston Red Sox. As part of the partnership, the IBEW Local 103 / NECA emblem along with the tagline “Powering Boston” will be emblazoned on Fenway Park’s historic Green Monster for the entirety of the 2018 and 2019 seasons. (Read full article on p. 2)

Governor Baker Signs Paid Family Medical Leave

July, 28, 2018, Boston, MA – Governor Charlie Baker signed into law H.4640 – An Act relative to minimum wage, paid family medical leave and the sales tax holiday, also known as the “Grand Bargain.” (Read full article on p. 5)

NECA Workshop : Best Practices for Electrical Contractors on September 11

On Tuesday, September 11, NECA Boston will host a Best Practices for Electrical Contractors workshop at the Boston Marriott Quincy. The program is designed to inform electrical contractors about proven business practices in the industry that lead to success. Sessions on Project Management, Specialty Insurances, Surety Bonding, Commercial Lending, and Understanding Contractor Policies and Requirements will be presented by leading industry professionals. The event will be sponsored by NECA Premier Partners – Northeast Electrical Distributors and Milwaukee Tools. For details and to register, call NECA Boston at 617-969-2521, e-mail Assistant Chapter Manager Kristen Gowin kgowin@bostonneca.org, or visit the Calendar on bostonneca.org.

Connections is a quarterly publication of the Boston Chapter of the National Electrical Contractors Association / Electrical Contractors Association of Greater Boston, Inc., 106 River Street, West Newton, MA 02465. Phone 617-969-2521. Mission: Connections is designed to provide information relating to current happenings in the electrical construction industry in Eastern Massachusetts, Maine, and New Hampshire and to report activities of the Boston Chapter of NECA and its members. Your comments are welcome. We can be reached via e-mail at: info@bostonneca.org.
BOSTON, MA – For many years, IBEW Local 103 electricians and NECA Boston Chapter contractors have been brightening historic Fenway Park, providing comprehensive electrical services to the Boston Red Sox organization — including the operation and servicing of the lights that shine over the most historic park in Major League Baseball. Now, IBEW Local 103 members, along with the union contractors of the National Electrical Contractors Association (NECA), have forged a broader partnership with the Boston Red Sox that will help power a number of key charitable initiatives. The agreement makes Local 103 and NECA proud partners of the Boston Red Sox.

As part of the partnership, the IBEW Local 103 / NECA emblem along with the tagline “Powering Boston” will be emblazoned on Fenway Park’s historic Green Monster for the entirety of the 2018 and 2019 seasons.

“The trust that the Red Sox put in NECA contractors and in IBEW Local 103 members speaks volumes,” said Glenn Kingsbury, Executive Manager of NECA’s Greater Boston Chapter. “It says that if we are the first choice to help keep the lights on when millions are watching, then we are the right choice for any developer, business, or other kind of customer that wants innovative, reliable, and safe electrical construction work done on their project.”

“IBEW Local 103 and NECA contractors are proud to deliver the highest quality and safest electrical construction, life safety, tel/data, A/V, and renewable energy services to many of the most prominent commercial, healthcare, biotech, educational, residential facilities in our region. We have always taken great pride in being the electrical team at Fenway Park and to have the Boston Red Sox as a customer,” said IBEW Local 103 Business Manager Lou Antonellis. “They trust us with making sure the games can happen — and we are very proud to now count ourselves among their official partners. Merging the efforts of two groups that already do so much charitable and neighborhood-based work will be a major positive not just for our organizations, but for the entirety of Red Sox Nation and the communities that we serve.”

As part of the partnership, NECA/IBEW Local 103 are serving as the presenting sponsor of the baseball equipment drive conducted by the Boston Red Sox to benefit Major League Baseball’s “Baseball Tomorrow Fund.” Equipment will be donated or repurposed towards a range of organizations and baseball or softball leagues that provide access to the game for underserved youth and communities. (see article on p. 6)

Furthermore, each time a Red Sox player successfully reaches base after hitting the IBEW Local 103 / NECA emblem on the Green Monster, IBEW Local 103 and NECA will donate Red Sox game tickets and $250 to local, charitable non-profits that provide resources and supportive programming to young people in Greater Boston. Benefiting youth, including Boston Children’s Hospital patients, are part of the Red Sox “Bullpen Buddies Night” initiative and will receive special recognition and hospitality at the games they attend, thanks to Local 103 / NECA.

The Red Sox and IBEW Local 103 / NECA have also agreed as part of their joint charitable portfolio work collaboratively to promote and expand the “Helmets to Hardhats” program that helps returning military service veterans find rewarding, family-sustaining careers in the construction trade industry.

As a service to fans at Fenway Park, NECA Boston and IBEW Local 103 also provided and installed new phone charging stations throughout the ballpark. In addition, IBEW 103 / NECA will serve as the presenting sponsor of the annual Babe Ruth coaches clinic at Fenway Park and will work together with the Sox on other community initiatives.

On June 22, IBEW Local 103 / NECA and the Boston Red Sox hosted a “Union Night” at Fenway Park as a throng of NECA contractors, Local 103 members and their families watched the Sox outslug the Seattle Mariners 14-10!

J&M Brown Company Shines in Ambassador Theatre Group’s Restoration of Boston’s Emerson Colonial Theatre

THE AMBASSADOR Theatre Group (ATG) offered a look inside the newly restored Emerson Colonial Theatre, which opened to the public July 10 with the first preview performance of the world premiere pre-Broadway engagement of Moulin Rouge! The Musical. Through collaboration with Elkus Manfredi Architects and Consigli Contracting Co., the renovation of Boston’s most storied venue harkens back to the building’s original 1900 design while introducing modern back-of-house technology and efficiencies, allowing the venue to welcome a diverse array of programming.

ATG, the world’s number one live-theater company, has entered into a long-term lease agreement with Emerson College to operate the landmark venue, including investing several million dollars in much needed capital improvements to the historic theater, and renewing the tradition of the Emerson Colonial Theatre as the birthplace of new Broadway musicals.

Gaston Electrical Near Completion with Electrical Construction of Brandeis University’s New Residence Hall

GASTON ELECTRICAL Co., Inc., based in Norwood, MA, is on schedule with the comprehensive core and shell electrical construction, and fit-out of the new 50,000 sf Brandeis University residence hall in Waltham.

The 164-bed residence hall will feature new common spaces for student performances or gatherings, a large kitchen, study spaces, four lounges, and an outdoor courtyard.

William Rawn Associates, of Boston is the project architect, and Gaston Electrical is working on a project team headed by general contractor/ construction manager Bond, of Medford. Gaston Electrical’s project manager Brian Demoree and foreman John Pember are heading the project team with a field crew ranging upwards of 20 IBEW Local 103 electricians at peak construction.

NECA Boston contractor commenced work on the project in June 2017 and the residence hall is scheduled to be open prior to the Fall 2018 semester in September.
Brava Electric's Vice President, Brenden DeAndrade, with Zachary Baum of BWB, LLC

Brava Electric & Telecom, Inc., based in Brockton, MA, has completed the core and shell electrical construction of the Bow Market project in Union Square in Somerville. The Bow Market development is an adaptive reuse project in which the storage bays at an old storage building have been transformed into small-scale boutique shops, food vendors, a microbrewery, and an array of artists from the Greater Boston area.

Brava Electric's Vice President, Brenden DeAndrade and Foreman Roger Richard managed the fast-track, 10-month project supervising a crew of eight IBEW Local 103 electricians and two technicians. Work began in September 2017 and the project was completed, as scheduled, in May 2018, when Bow Market opened to the public. A grand opening celebration will be held in late summer when all establishments will be in operation.

Matthew Boyes-Watson and Zachary Baum of BWB, LLC are co-founders of the progressive urban development. “The construction project went smoothly following a complex demo phase,” said Boyes-Watson. “We’re very pleased with Brava Electric’s quality of work and coordination on the project — and especially the lighting accents at Bow Market, which create a phenomenal evening atmosphere.”

Brava Electric's project scope entailed installation of the facility’s power distribution, fire alarm system, lighting and lighting control systems, as well as the tel/data infrastructure to each of Bow Market’s 34 boutique shops, restaurants, and brewery. Power distribution is provided from Eversource vaults into the development’s main electric room. Brava installed a 1600A switchboard which feeds 100A electrical panels in each of the tenant spaces. Unique exterior accent lighting is provided via LED tape lights installed in the supporting beams of the Bow Market development.

Brava has also provided electrical fit-out for several of the marketplace’s tenants, including Remnant Brewing Company, a microbrewery located in the heart of the plaza. The brewery’s electrical installations are elaborate, supporting state-of-the-art brewing equipment. Remnant Brewing’s courtyard features catenary/string lighting.

NECA Boston Conducts BIM Construction Workflow Workshop

On July 25, NECA Boston Chapter held a BIM Construction Workflow Workshop at the Greater Boston JATC in Dorchester. The NECA continuing-ed program familiarized CADD coordinators, project engineers, and project managers, and executives with BIM programs and processes, including Revit, Navisworks, BIM 360, and Markup and Information Exchange Process.

The workshop enhances the ability of electrical project teams to effectively deal with BIM project workflows, file transfers, and information exchange. Twenty-five staff members from NECA contractors attended, including personnel from Ostrow Electric, E.G. Sawyer, Fischbach & Moore, Averill Electric, Aldon Electric, John A. Penney, J&M Brown, JM Electrical Murphy Electric, T&T Electrical Contractors, and J.F. White.

A NECA BIM Fundamentals workshop is planned for September and additional BIM seminars are planned for 2019.

Course instructor Tom Cassell is an Autodesk Certified Instructor and BIM Certified Instructor.
LEGISLATIVE NEWS

NECA Boston Members Advocate for Key Issues at NECA 2018 National Legislative Conference

WASHINGTON, D.C. – On May 16th and 17th, members of NECA Boston Chapter Legislative Committee joined with Tremont Strategies Group in representing the electrical construction industry in Massachusetts at the 2018 National Legislative Conference in Washington, D.C. NECA Boston was represented at the conference by Dan Venezia, T&T Electrical Contractors, Inc.; Michael McDonald, McDonald Electrical Corp.; Joe Bodio, LAN-TEL Communications; Kathleen Guinee, Aetna Fire Alarm Service Co., Inc.; Matt Guarracino, J.M. Electrical Company; John Rudicus, Sullivan & McLaughlin Companies; Joseph McCluskey, Jr., E.G. Sawyer Co.; Sue Mailman, Coghlin Electrical Contractors, Inc.; Michael Bergan and Liesl Sheehan of Tremont Strategies Group; and Kristen Gowin, Assistant Manager, NECA Boston Chapter.

Key legislative issues that were addressed include:

- Supporting the GROW Act authorizing innovative composite plans to modernize the Multiemployer Pension Plan system
- Allowing apprentices to utilize 529 education saving plans to finance ancillary apprenticeship costs
- Ensuring small businesses get paid in a timely manner on Federal construction projects; and Reform the Administration of Change Orders
- Investing in our Nation’s Infrastructure — supporting passage of a robust, comprehensive infrastructure funding bill that addresses needs in all sectors – airports, highways, railroads, and public transit systems
- Enacting Federal Tax Reform
- Repealing the 40 percent Cadillac tax on contractors’ health plans

Governor Baker Signs Paid Family Medical Leave
Contributions to begin in 2019; employee benefits to be offered in 2021

Continued from page 1

In place of the Ballot Initiatives, that were expected to address these issues in the November election, the compromise legislation will create a permanent sales tax holiday, phase in a minimum wage increase over the next five years, and create a new paid family and medical leave program in Massachusetts. The most notable for NECA contractors is the new Paid Family and Medical Leave Program.

Overview of Paid Family Medical Leave Program

The new paid leave program offers employees up to 12 weeks of paid family leave to care for a new baby or family member in a benefit year and up to 20 weeks of paid medical leave to deal with their own medical issues. A new Department of Family and Medical Leave will be created to administer the paid leave program.

The program will be funded by employers and employees through a new payroll tax of 0.63 percent (which will be adjusted annually). The family leave will be provided by employee contributions to the fund, while the personal medical leave will be split between the employee (40%) and the employer (60%) for employers with more than 25 employees. Employers with less than 25 employees will not be responsible for contributing on behalf of their employees, however, they will still be required to deduct the payroll tax from their employees’ wages. In addition, the law also contains strong anti-retaliation provisions for all employers.

The roll-out of the law will occur over the next several years. Beginning January 1, 2019, employers must notify employees about the benefits available through the paid leave program and provide all new employees a written notice within 30-days of hire, explaining the benefits. Then, beginning in July 2019, contributions will begin to be paid into the program. Personal and medical leave will begin to be offered in January 2021 and family leave will begin in July 2021.

NECA Boston to be proactively involved in Family Medical Leave Rulemaking Process

NECA Boston Chapter and other construction trade associations have been engaged in the legislative process for months, weighing in with the working group that worked alongside the legislators to draft and pass the bill. The working group included representatives from Raise Up, Boston Chamber of Commerce and Associated Industries of Massachusetts. On June 1, 2018, NECA and several construction associations, including AGC and ASM, sent a letter to the State House expressing our concerns regarding the legislation and the immense burden it would have on employers, as well as potential unintended consequences on the construction industry.

Continued on bottom of page 6
ON MAY 22nd, NECA Greater Boston member contractors attended a productivity and profitability workshop, conducted by Dr. Heather M. Moore, Vice President of Operations for MCA, Inc. The program presented productivity improvement principles that have helped other industries, such as automotive, manufacturing, commercial airplane producers, and the retailing industry which can be applied effectively in the electrical contracting industry.

The program explained how to prepare for the new labor market realities and examined the principles that have increased productivity of labor, project, office management, and operational theories. The program was attended by management staff from Absolute Renewable Energy, Aldon Electric, Ayer Electric, Bent Electrical, Chapman Construction, Infowires, J.M. Electrical, J&M Brown Company, John A. Penney, LAN-TEL Communications, Lynnwell Associates, McDonald Electrical, Stalker Electric, Sullivan & McLaughlin Companies, and T&T Electrical.

Registrations Open for NECA 2018 Show & Convention in Philadelphia

NECA 2018 Philadelphia, the electrical industry’s leading trade show and convention, will feature more than 300 exhibitors, comprised of the industry’s leading manufacturers, distributors and service companies. Thousands of cutting-edge products will be on display with live demos on the show floor. The show will provide NECA contractors with best electrical industry practices and compliance information. Technical workshops will cover the latest information in Standards and Safety, Project Management, and Technology, Process and Innovation, Lighting & Controls, and much more — all designed to ensure NECA contractors are the best informed in the industry. For more info and to register, visit necaconvention.org.

NECA’s ELECTRI International Publishes Two New Reports

Quality in Construction – Improving Productivity and Establishing A Built-in-Quality (BIQ) Program; Best Practices for Electrical Contractors

The BIQ research, conducted by Professor Lonny Simonian, California Polytechnic State University, offers a new method in construction that uses a real-time, interactive process to increase quality and reduce rework. A BIQ program focuses on the initial stages of a quality process by first identifying customer expectations, converting these expectations into requirements, developing design operations, and then performing the work.

The second publication, Best Practices for Electrical Contractors focuses on a national survey that identified the seven most effective change management practices recommended by NECA contractors. The interviews collected lessons learned and tangible examples of organizational change adoption. ELECTRI anticipates the results will help many NECA contractors become “Early Adopters” to achieve successful and more profitable outcomes after implementing organizational change initiatives.

ELECTRI International helps electrical contractors meet today’s demands and tomorrow’s challenges by funding, conducting, coordinating and transforming research results into useful educational and consulting programs. NECA Boston Chapter is a proud member of the ELECTRI Council, as a Diplomat level sponsor of the industry’s leading research organization.

Paid Family Medical Leave Legislation

The union construction employer associations met with the chairs of the working group to discuss the unique benefits structure of the multi-employer industry.

The new law is very complex, and its requirements will be clarified and further defined by administrative regulations. NECA Boston and our union employer groups will continue to work in earnest with the Administration and the new Department of Family and Medical Leave during the rule making process. Draft regulations for public comment/hearing are expected to be issued on March 31, 2019. The final regulations are expected in July 2019.

We will have additional details on these new leave requirements as key implementation dates approach and more clarity is provided by regulation.

Construction trade associations working on Paid Family Medical Leave legislation:
**SAFETY NEWS**

**Gaston Electrical Participates in 2018 National Construction Safety Week**

*Importance of ladder safety and inspection highlighted during annual event*

NECA BOSTON contractor, Gaston Electrical Co., Inc., based in Norwood, MA, took part in the 2018 National Construction Safety Week from May 7-11. The annual construction safety event, organized by OSHA, united over 80 large construction firms to promote industry-wide education and awareness while discussing the importance of making safe decisions on the job site.

National Construction Safety Week invites construction companies to speak with their employees about job site safety through programs such as toolbox talks, policy reviews, and equipment inspections. 2018 marked Gaston’s fourth year as a participant — highlighting the company’s commitment to ensuring safe work environments for employees, project partners, and end-users. During the week, Gaston Electrical’s Safety Director Rick Coakley visited over 20 active job sites, leading discussions on ladder safety, proper usage, and daily inspection protocols. Rick was also joined by Mike Weber, Gaston Principal; Nina Radzim, Director of Human Resources; and Tim West, Director of Marketing. Highlights of the week included visits to some of Gaston’s larger job sites including 250 North Street at Cambridge Crossing, AMGEN in Kendall Square, Residence Halls at UMass Boston, The Auerbach Center / Boston Celtics Practice Facility at Boston Landing, and Wayfair in Copley Square. “We take pride in our corporate safety culture, so we’re continuously working to improve conditions and practices in the field,” said Coakley. “National Safety Week is a unique opportunity to focus on safe practices, and foster further educational discussion with our most important asset — our skilled team.”

**COMMUNITY OUTREACH**

**NECA Greater Boston and IBEW Local 103 Partner with Red Sox in Baseball Equipment Collection Drive Benefiting Kids Gear for Baseball**

BOSTON, MA – As part of a league wide initiative between Major League Baseball, the Major League Baseball Players Association, and the Baseball Tomorrow Fund, the Boston Red Sox hosted a baseball and softball equipment collection during the Red Sox-White Sox series at Fenway Park in June, presented by NECA Boston Chapter and IBEW Local 103. Fans were invited to drop off new and used equipment outside all Fenway gates.

The NECA Boston office at 106 River Street in West Newton and IBEW Local 103 Union Hall at 70 Freeport Street in Dorchester were also designated official community drop-off locations.

The equipment benefits the Kids Gear for Baseball organization, a Massachusetts-based nonprofit organization that distributes equipment to children in need. The organization has donated to more than 30 youth organizations, shelters, and missions over the last eight years.

In conjunction with the equipment drive, the Baseball Tomorrow Fund awarded a grant of $5,000 to Kids Gear for Baseball for the purchase of new equipment. In recognition of the grant, Cathy Bradley, Executive Director of the Baseball Tomorrow Fund, presented a ceremonial check to the Kids Gear for Baseball organization during a pre-game ceremony on Saturday, June 23.

In 14 seasons, Baseball Tomorrow Fund has provided thousands of pieces of new and used equipment and $1.7 million in total monetary donations to more than 200 organizations in need.

*Continued from page 1 NECA’s Ongoing Education and Training Programs*

workshop. These programs will be followed by Introduction to Foreman Training and Level 2: Advanced BIM workshops in Oct. and Level 3: BIM Coordination in November.

All of this surrounds the upcoming 2018 NECA Convention in Philadelphia, Sept. 29 - Oct. 2, where leaders in electrical construction are kept abreast of cutting-edge electrical products and services, technologies, and safety protocol in the world’s leading electrical construction conference and trade show. It is experience, education, training, and performance that distinguish NECA electrical and tel/data contractors from non-union contractors. We look forward to continuing to report on our continuing eduction and training initiatives, as well as the outstanding performance of our contractors in projects throughout Greater Boston, New Hampshire and Maine.
Featured Speaker: JATC Greater Boston Training Director, Chris Sherlock

On June 20, the NECA Boston Chapter meeting highlighted the association’s leadership in and commitment to education and training. Chris Sherlock, Training Director for the Joint Apprenticeship and Training Committee (JATC) of Greater Boston was the featured guest speaker.

Sherlock presented a comprehensive overview of the breadth and depth of Boston’s five-year electrical and telecom training programs. The Greater Boston JATC program, sponsored by NECA Boston and IBEW Local 103, is recognized nationally as a leader and pioneer in its electrical and telecom training programs, conducted in the state-of-the-art industry training facility in Dorchester.

Sherlock spoke of the vibrant state of apprenticeship training in Boston – presently there are 1,348 apprentices in the program, including 211 first year apprentices, the largest and most diverse class in Local 103 / JATC history. He was accompanied at the meeting by Assistant Training Director Jay DeMello, recently appointed Assistant Training Director, Chris Antonellis, and by fellow instructors and colleagues at JATC Greater Boston.

NECA Boston/Wentworth Student Chapter’s Green Energy Challenge Project

The NECA Boston/Wentworth Student Chapter team also presented their 2018 Green Energy Challenge project entry into the national NECA Award program – the modernization and electrical-efficiency upgrades for the 112 Southampton Street Shelter in Boston, comprised of a comprehensive LED lighting retrofit, rooftop PV/solar system, as well as HVAC control system upgrades. Several NECA Boston Chapter member companies were recognized by the Wentworth team for their contributions to the project, including J.M. Electrical Company – energy-efficiency analysis; Sullivan & McLaughlin Companies – lighting retrofit; Mass Electric Construction – rooftop solar system; and McDonald Electrical Corp. – Estimate, Schedule and NECA E-CAP Finance Plan. Gilbane Building Company was also recognized for their leadership in the effort.

NECA Boston’s Robust Educational Programs Featured

NECA Boston Chapter Board of Directors member Brian Murphy, of A. Murphy Inc., based in Hanover, MA, who serves as the Chair of the Education Committee presented an overview of the wide-ranging educational programs offered by NECA Boston in 2018, including BIM, Foreman Training, Advanced Estimating, Best Practices and many others.

Special Recognition Awards to Stalker Electric and Greg Sapochetti

Ben Nest, Field Representative, Eastern Region for NECA presented Will Stalker, Stalker Electric, Inc. founder and president, the NECA 25-Year Membership Award. Stalker was accompanied by his son and company vice president, Shawn Stalker.

Greg Sapochetti*, recently retired vice president of J.F. White, and longtime member of the NECA Boston Board of Directors, was recognized for his industry contributions with an Honorary NECA Member Award.

Nest also presented NECA Boston Chapter President, Michael McDonald, of McDonald Electrical Corp., and Glenn Kingsbury, Executive Manager of NECA Boston, with a NECA Mission, Vision, and Core Values plaque focused on an unwavering commitment to excellence and leadership while “Empowering Lives and Communities.”
